

Key Idea

Volume of a Cylinder

Words The volume V of a cylinder is the product of the area of the base and the height of the cylinder.

Algebra $V = Bh$

Remember

The slanted figure is called an *oblique solid*. Volumes of oblique solids are calculated in the same way as volumes of right solids.

Finding the Volume of a Cylinder

Ex:) Find the volume of the cylinder. Round your answer to the nearest tenth.

Notes:

OYO:) Find the volume of a cylinder with a radius of 4 feet and a height of 15 feet. Round your answer to the nearest tenth.

Notes:

Finding the Height of a Cylinder

Ex:) Find the height of the cylinder. Round your answer to the nearest whole number.

Notes:

OYO:) Find the height of the cylinder. Round your answer to the nearest tenth.

Notes:

Finding the Radius of a Cylinder

Ex:) Find the radius of the cylinder. Round your answer to the nearest whole number.

Notes:

OYO:) Find the radius of the cylinder. Round your answer to the nearest tenth.

Notes:

Modeling Real Life

Ex:) You use the cylindrical barrel shown to collect and study rainwater.
About how many gallons of water can the barrel hold? ($1 \text{ ft}^3 \approx 7.5 \text{ gal}$)

Notes:

Ex:) A cylindrical swimming pool has a circumference of 18π feet and a height of 4 feet. About how many liters of water are needed to fill the swimming pool to 85% of its total volume? Justify your answer.
($1 \text{ ft}^3 \approx 28.3 \text{ L}$)

OYO:) How much salsa is missing from the jar? Explain your reasoning.

Notes:

How much salsa is missing from the jar? Explain your reasoning.
