

Key Idea

Quotient of Powers Property

Words To divide powers with the same base, subtract their exponents.

Numbers $\frac{4^5}{4^2} = 4^{5-2} = 4^3$

Algebra $\frac{a^m}{a^n} = a^{m-n}$, where $a \neq 0$

Evaluating Expressions

Ex:) Evaluate. Express answers with positive exponents.

Notes:

a. $\frac{2^6}{2^4}$

b. $\frac{(-7)^9}{(-7)^3}$

c. $\frac{h^7}{h^6}$

OYO:) Simplify. Leave answers in exponential form.

Notes:

a. $\frac{4.2^6}{4.2^5}$

b. $\frac{(-8)^8}{(-8)^4}$

Simplifying an Expression

Ex:) Simplify $\frac{3^4 \cdot 3^2}{3^3}$. Write your answer in exponential notation.

Notes:

OYO:) Simplify $\frac{2^{15}}{2^3 \cdot 2^5}$. Write your answer in exponential notation.

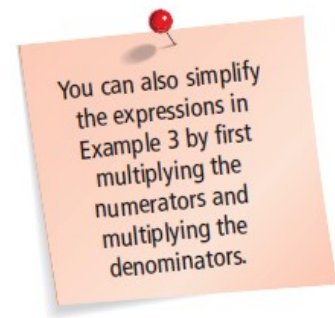

Notes:

Simplifying Expressions

Ex:) Simplify the expression. Write your answer in exponential notation.

Notes:

$$\frac{(-4)^9 \cdot (-4)^8}{(-4)^5 \cdot (-4)^2}$$

b. $\frac{a^{10} \cdot a^7}{a^6 \cdot a^4}$

OYO:) Simplify the expression.

Notes:

a. $\frac{p^3 \cdot p^6 \cdot p^4}{p^2 \cdot p}$

b. $\frac{(-5)^7 \cdot (-5)^6}{(-5)^5 \cdot (-5)^2}$

Modeling Real Life

Ex:) The projected population of Tennessee in 2030 is about 5×10^8 . Predict the average number of people per square mile in Tennessee in 2030.

Notes:

OYO:) An earthquake of magnitude 3.0 is 10^2 times stronger than an earthquake of magnitude of 1.0. An earthquake of magnitude 8.0 is 10^7 times stronger than an earthquake of magnitude 1.0. How many times stronger is an earthquake of magnitude 8.0 than an earthquake of magnitude 3.0?

Notes:
